PROFESSIONAL SUMMARY

Azure IT Specialist currently pursuing an M.S. in Computer Information Systems at the University of Michigan–Flint, with roughly twenty years of software and systems experience. I design and deliver cloud solutions in regulated environments—from storage and cost optimization to secure network architecture—and came up through multithreaded C++ on large-scale SCADA systems. Bilingual (English/Spanish), strong in documentation, vendor coordination, and turning complex requirements into working systems.

TECHNICAL SKILLS

Cloud: Microsoft Azure (Blob Storage, SFTP, Backup, monitoring, cost optimization) • **Security & Compliance:** HIPAA/HITRUST, Microsoft Defender for Cloud, RBAC • **Architecture:** hub-and-spoke networking, FortiGate NVA • **DevOps:** Azure DevOps CI/CD (YAML) • **Programming:** C#, .NET, Python, C++

PROFESSIONAL SKILLS

Vendor management and IT–vendor liaison • Technical documentation (runbooks, client guides, compliance docs) • Project coordination (change windows, cutovers) • Mentoring and teaching • Analytical problem-solving • Bilingual (English/Spanish)

PROFESSIONAL EXPERIENCE

Azure IT Specialist — TGIDirect Current

- Migrated ~50 external clients from a legacy managed-transfer product to Azure Blob SFTP, with lifecycle policies, SSH key management, and compliant documentation.
- Reduced Azure storage cost by consolidating file servers, optimizing disk tiers, and migrating large volumes of small files from premium SSD to Azure Cool storage with AzCopy.
- Designed a secure hub-and-spoke network architecture with a FortiGate NVA for a HITRUST-regulated environment.
- Built Azure monitoring tied to vendor SLAs and Azure DevOps CI/CD pipeline templates with compliance gates.

Web / Cloud Developer — Flint and Genesee Literacy Network Jan 2024 – Present

- Designed and deployed an Azure-based internal management system, improving reporting efficiency by about 25%.
- Standardized workflows and data collection to reduce reporting delays; supported vendor evaluations and documentation.

Tutor, Programming & Web Development — Mott Community College 2023 – 2024

- Tutored students and faculty in programming and web development, translating complex concepts into practical solutions.

Software Development & Teaching 2006 – 2016 · Havana, Cuba & Mérida, Venezuela

- Built automation tools in C#, SQL, Python, and C++, improving operational efficiency by up to 30%.
- Developed SCADA HMI frameworks and a cross-platform TCP/UDP network communication library for real-time systems.
- Instructed students in programming and networking fundamentals.

EDUCATION

M.S. in Computer Information Systems (in progress) — University of Michigan–Flint · Expected 2026
Associate in Computer Information Systems — Mott Community College, Flint, MI · 2024
B.S. in Informatics Engineering — University of Informatics Sciences, Havana, Cuba · 2007

CERTIFICATIONS

Advanced C++ Programming (uCertify, 2024) • Systems Analysis and Design (uCertify, 2024) • Web Developer Certificate (Mott Community College, 2024) • Computer Programming Certificate (Mott Community College, 2024)
